

# The all-new CEREC

## Optimal workflow control and peace of mind

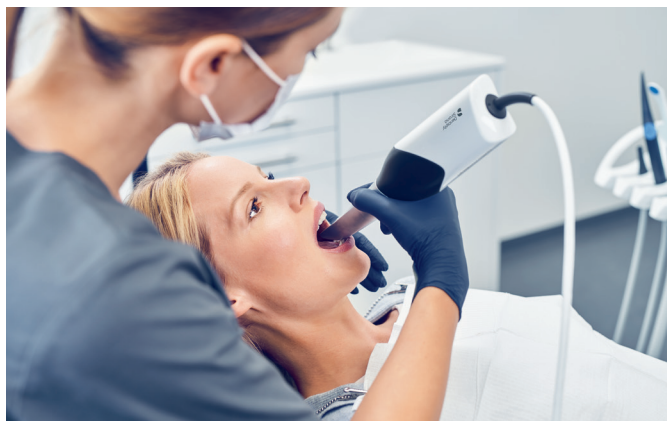

### Now is the time

In the current market dynamics, trust and hygiene have gained even more relevance for patients. With CEREC you can benefit from seamless digital chairside dentistry, with every single component designed for greatest convenience and the highest hygiene standards. The innovative and intuitive CEREC technology enables you to treat patients with maximum safety while at the same time increasing efficiency.

Deliver the highest hygiene standards in every step of the workflow

Maximize safety and convenience with Single Visit Dentistry

### 1 Digital impression

- Comfortable digital impressions without the risk of contaminated impression trays
- Cleaning and disinfection options which surpass regulatory requirements
- Versatile concept with 3 different sleeve for all hygienic needs
- The Acquisition Center is a medical device approved for use in patient vicinity
- Fully closed scanning window to prevent fluid infiltration during the scanning process

### 2 Design

### 3 Grinding or milling

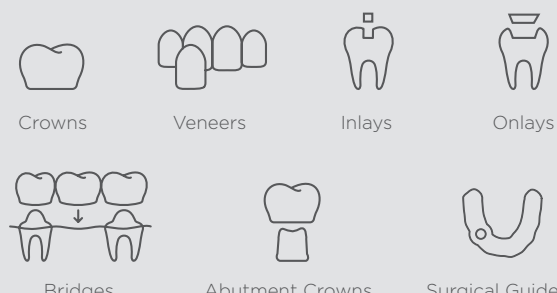

### 4 Sintering and finishing

#### Convenient and safe in-house production with CEREC:

- Restorations can be created in a single visit – a more efficient workflow with minimized patient risk
- Appointment scheduling is optimized, reducing waiting time and social interactions
- Enables full control and predictability, with every step of the workflow being done in the practice reducing cross-contamination risk
- With longer individual sittings, cleaning and disinfection protocols have to be performed fewer times a day

# Healthy and safe smiles in a single visit with many material options for different indications

Patients feel more comfortable spending less time getting treated. The all-new CEREC gives the options you need to treat multiple indications with the confidence that comes from outstanding results.

Crowns      Veneers      Inlays      Onlays

Bridges      Abutment Crowns      Surgical Guides

You can also treat larger and more complex cases, and expand treatment options with our orthodontonic and implant solutions

CEREC Primescan quickly delivers highly accurate scan data

Excellent initial proposals in just five clicks with the CEREC Software

CEREC Primemill, the new, best-in-class milling unit makes digital chairside dentistry faster, easier and more reliable than ever before

## Future-proof your practice and benefit from an established technology and well-known brand

*„My patients have always valued our ability to deliver indirect ceramic restorations in a single visit with CEREC. Now, since the COVID-19 pandemic, they appreciate it even more! It allows us to continue to safely and efficiently provide the best quality care. In this new environment, single visit dentistry is no longer a luxury, but rather a necessity.“*
